Wireless Casting Solution

Commercial

All fixed installed hardware comes with a 3 year commercial manufacturers warranty

Wireless Microphones: Enjoy the freedom to roam and engage with your audience without being tethered to a microphone. The included charging station ensures the microphones are always ready to go.

Bluetooth Connectivity: Easily stream music or audio from compatible devices to enhance the energy and excitement of your events at a commercial level.

Wireless Presentation: Seamlessly connect laptops, tablets, or smartphones to the audio system for interactive presentations without the hassle of cables.

Intuitive Control Panel: Allows for easy management of audio and presentations with a simple interface.

Venue Hire Ready: All controls are securely locked and keys are provided for easy access

LARGE VENUE SPEAKER OPTIONS

Option 1:

**Value Performance:
Small to Medium Venue**

Option 2:

**Enhanced Performance:
Medium to Large Venue**

High-Quality Value Equipment: Ideal for those seeking excellent sound performance with cost-effectiveness.

Array Style Speakers: Ensures extremely clean and even sound distribution, preventing sound reflection.

Speech Integrability: The horizontal pattern provides clear and strong speech integration across the space.

Enhanced Sound: Includes low frequency drivers for fuller sound, suitable for both speech and music.

Small-Mid Venues: Ensures high-quality audio for events and presentations in smaller to medium-sized spaces.

Superior Performance: Delivers amazing sound clarity and coverage compared to traditional box speakers.

Advanced Audio Technology: Systems are powered by digital amplifiers with DSP for precise sound control and optimisation.

Superior Mid-Level Equipment: Offers higher performance output for more demanding audio needs.

Advanced Array Style Speakers: Features both wide horizontal and steered vertical sound distribution.

Room-Filling Sound: Low frequency drivers for powerful, room-filling audio suitable for music performances.

No Extra Systems Needed: Perfect for events with music, removing the need for additional sound systems.

Ideal for Mid to Large Venues: Provides robust sound coverage for larger spaces, ensuring an immersive audio experience for all attendees.

Exceptional Sound Quality: Outperforms traditional box speakers with enhanced clarity, coverage, and low frequency response.

Cutting-Edge Technology: Systems are powered by digital amplifiers with DSP for superior sound management and performance.
